

IMPERIAL VALLEY

A Roadmap for Electric Vehicle Charging

Help Shape Where EV Chargers Go in Imperial County – Take the Survey!

IMPERIAL COUNTY EV CHARGING STATION PASSENGER VEHICLE FEASIBILITY STUDY

The Imperial County Transportation Commission (ICTC) is leading a countywide study to identify where new electric vehicle (EV) charging stations should be located. Today, Imperial County has the fewest EV chargers per person in California, and your input will help close the gap.

We are sharing **preliminary proposed charging locations** based on community feedback, site visits, local travel patterns, and coordination with local utilities. Your feedback will help ICTC prioritize locations for site selection, design, and funding.

Please note: Even after a site is selected, design, equipment lead times, construction, and installation can take 12–24 months.

TAKE THE SURVEY

BY APRIL 20, 2026

All participants will be entered to win one of two \$50 Cardenas gift cards.
