

IMPERIAL VALLEY

A Roadmap for Electric Vehicle Charging

Help Shape the Future of EV Charging in Imperial County!

Imperial County EV Charging Station Passenger Vehicle Feasibility Study

The Imperial County Transportation Commission (ICTC) is leading a countywide study to plan where electric vehicle (EV) charging stations should be located across the county. Today, Imperial County has the fewest EV chargers per person in California.

Why EV charging is important for Imperial County:

- Cleaner air and healthier communities
- Boost local economy through tourism and spending
- Advance transportation equity for all residents

This study will explore:

- Where current charging stations exist and where additional charging stations are needed most
- How to make charging easy and convenient
- Ways to increase adoption of clean transportation for all residents

Take the survey by Jan. 20, 2026 and be entered to win one of two \$50 Cardenas gift cards.
